For Immediate Release: Eagle Tower Committee continues to develop concept options for new Tower.

The Eagle Tower committee continues to work through multiple concept options for a new Tower. Several goals were set forth for the committee and the hired firm including that the tower resemble as close to the old Eagle Tower as possible, the new tower should be fully accessible and have a long lifespan with minimal maintenance and upkeep. The committee will continue to develop these concepts and meet with key stakeholders. As such, the public meeting will occur in the coming weeks. A future date for a public meeting has yet to be determined but is anticipated to be in early summer.

Questions regarding the new Eagle Tower can be directed to:
